

"My father and mother both worked at the Millers Falls Tool Co. in Millers Falls in the 1960s and 1970s. Dad operated the Brown and Sharp Automatic Screw Machines. He retired from Beta Fog Nozzle having run the B and S machines there after Millers Falls Tools closed. I also worked for a very short time at Millers Falls Tools in 1968 between college graduation and entering pilot training at the United States Air Force."

Francis Dobosz

"My great grandparents in the 1920s were watchman at Threadwell Tap and die. My ancestors (Barleys) came from Sheffield, England to work at Lamson and Goodnow in Shelburne. My father worked at Greenfield Tap and Die at plants 1 and 2 until 1972. Excellent Exhibits! Learned a great deal. Much luck with the museum's growth!"
